

Telecommunication Software Development Team

SCOPE OF ACTIVITIES

As a designer and integrator of telecommunication networks, having the knowledge for integration of multiple ICT technologies into optimized and high performance networks, our primary activities are in the following fields:

- IP Communications Networks,
- Switching Systems,
- OSS/BSS Systems
- Access Networks,
- Transmission Systems & Radio Networks,
- Telecommunication Software Development,
- Next Generation Networks.

TELECOMMUNICATION SOFTWARE DEVELOPMENT

In cooperation with our partners, we provided a wide range of high quality solutions and services in: General Application Development and Integration, Enterprise Systems, Security Systems, e-Solutions,...

Mastering following technologies:

- Development Frameworks (Microsoft / .NET, Java / J2EE),
- Database Management Systems (SQL, Oracle, Postgress)
- Systems Management (Windows, Linux, Solaris)
- VoIP
- TAP3 standard

Energoinvest is Microsoft Certified Partner.

Installation, Commissioning & Network integration

REFERENCES

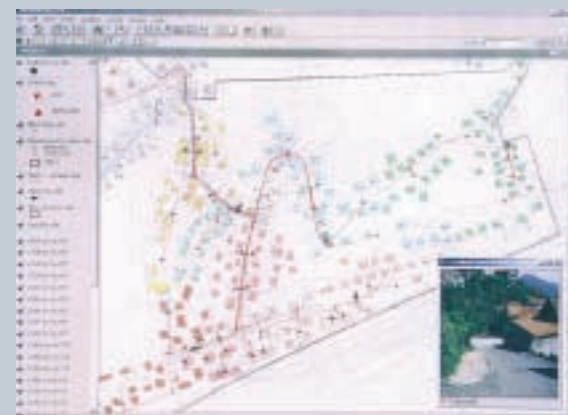

The main projects summary is given below. All our projects were realized with high quality, on our clients' satisfaction.

- Digital switching systems EWSD
- SDH&DWDM transmission systems
- Optical cable lines/networks
- Design of telecommunication access networks, using GIS technology
- IP based Video Surveillance
- IP-TV System

- System for controlling, configuring, setting up Network elements
- NGN Interoperability Testing
- Project for the Expansion of the IN network covering BH Telecom fixed telephony network
- National Wireless Fidelity (WiFi) Feasibility Study for BH Telecom
- Study for purchasing HW and SW platform for supervision and maintenance of BH Telecom network
- Implementation of TAP 3 solution
- Provider of the School SMS service

BASIC ACTIVITIES

- Consulting,
- Planning & Design,
- Telecommunication Software Development,
- Installation, Commissioning & Network integration,
- After-sale Support
- Hardware and Software Upgrade

Design of Telecommunication Access networks, using GIS technology

STAFF

We have professional teams with expert knowledge from different fields of communications networks and technologies. Our staff is permanently learning and acquiring theoretical and practical knowledge in the best centers for educations in Europe.

Our specialists proactively participate in national and international bodies for standardization.

PARTNERS

Iskratel, Slovenia; Nokia Siemens Networks Finland; Alcatel-Lucent France; Yankee Group, Boston-USA; Allround, Budapest-Hungary; Cisco Systems; Kate-Kom, Zagreb-Croatia.

SDH&DWDM Transmission Systems

INTEGRATED MANAGEMENT SYSTEM

In our company, ENERGOINVEST d.d. – Sarajevo, we apply and constantly improve the Integrated Management System, certified according to the international standard series ISO 9001 : 2000; ISO 14001 : 2004 and BS standard OHSAS 18001 : 2007.

The results of the above are products and services of high quality with permanent care as to environmental protection and occupational safety.

In all our projects we use our own Integrated Management System procedures for quality control as well as the procedures of our clients and partners.

Our Clients

- Countries in which Energoinvest exports its goods and services
- Energoinvests representative offices
- Countries in which Energoinvest has its own companies
- Countries in which Energoinvest has joint-venture companies
